Three more recoveries from coronavirus in UAE

15 Mar, 2020: The Ministry of Health and Prevention, MoHAP, announced the full recovery of three additional individuals from the novel coronavirus, COVID-19, bringing the total number of recovered cases in the country to 26.

The Ministry said in a statement today that the recovered - two Bangladeshis and an Indian - were now "symptom-free" after receiving the necessary healthcare.

The Ministry affirmed that the UAE's handling of the cases, from diagnosis until recovery, reflect the high standards of its health care system which the country's leadership made available to all.

The ministry also added that individuals infected by the virus are provided with the highest standards of healthcare and are kept under close observation by specialised medical teams, in alignment with WHO guidelines.
